

UN ENVIRONMENT JUNIOR PROFESSIONAL OFFICER REQUEST

General Information

Post Title: Junior Professional Officer/Associate Expert – Multistakeholder Engagement, Partnerships and Communications for Higher Impact and Transformational Change

Office/division/MEA: Ecosystem Division

Unit: Source-to-Sea Pollution Unit

Location: Nairobi

Duration: 2 years, with possibility to extend for 3 years

Background information on UN Environment and the requesting Unit

The United Nations Environment Programme (UNEP) is the leading global environmental authority that sets the global environmental agenda, promotes the coherent implementation of the environmental dimension of sustainable development within the United Nations system and serves as an authoritative advocate for the global environment. UNEP's Ecosystems Division works with international and national partners, providing technical assistance and advisory services for the implementation of environmental policy, and strengthening the environmental management capacity of developing countries and countries with economies in transition.

The Source-to-Sea Pollution Unit of the Marine and Freshwater Branch supports members states to protect the marine environment from land-based pollution through strengthened coordination of global action. The Unit addresses in an integrated way the three major pollution streams that are affecting the marine environment: marine litter, nutrient and wastewater pollution.

UNEP, through the Marine and Freshwater Branch and the Source-to-Sea Pollution Unit also hosts the secretariat of three global partnerships on marine litter (Global Partnership on Marine Litter – GPML) wastewater (Global Wastewater Initiative – GWWI) and nutrients (Global Partnership on Nutrient Management – GPNM). The Unit is currently implementing the project “*Protecting the Marine Environment from Land-Based Pollution through Strengthened Coordination of Global Action*” which seeks to enhance responses to the land-based pollution of the marine environment including by strengthening partnerships, stakeholder engagement and communication. A new follow-up project will be implemented starting from January 2024.

Why is the Junior Professional Officer requested/needed?

The Junior Professional Officer/Associate Expert will contribute to the implementation of activities aimed at strengthening partnerships, stakeholder engagement and communication under the project “*Protecting the Marine Environment from Land-Based Pollution through Strengthened Coordination of Global Action*” and its follow-up phase. There are several

on-going activities on partnerships, communication and stakeholder engagement such as the coordination of the Global Wastewater Initiative (GWWI) and the Global Partnership on Nutrient Management (GPNM). The Unit also needs support in the implementation of communication-related activities linked to the existing project, as well as fostering coordination with potential donors, governments, and relevant stakeholders. Multistakeholder Engagement, Partnerships and Communications are strategic elements for UNEP's work to reach higher impact and promote the level of transformational change necessary for the Source-to-Sea approach to be scaled-up at regional, national and local level. The JPO will make a valuable contribution for the organization to engage with key stakeholders beyond our usual partners. This includes the private sector, development banks and agencies, innovative entrepreneurs, sub-national and local governments, and CSOs (especially related to gender, youth, and indigenous people). The Junior Professional Officer/Associate Expert will provide support to the overall Unit. The requested period is for 2 years, with the possibility of extension for another year based on performance and funding.

Supervision

Direct supervision by: Alex Pires
Title supervisor: Programme Management Officer
Unit supervisor: Source-to-Sea Pollution Unit
Location supervisor: Ecosystems Division
Address: P.O. Box 30552-00100
Nairobi, Kenya.

Duties, responsibilities and output expectations

Terms of reference

Under the overall guidance of the Chief of the Source-to-Sea Pollution Unit and the direct supervision of the Programme Management Officer, the Junior Professional Officer/Associate Expert will undertake the following tasks:

- 1. Contributing to the implementation of activities aimed at strengthening partnerships, stakeholder engagement and communication for the Source-to-Sea Pollution Unit, including private sector, development banks and agencies, innovative entrepreneurs, sub-national and local governments, and CSOs (especially related to gender, youth, and indigenous people).**
 - o Prepare, finalize, or provide inputs to assessments, articles, stories, drafts, publications, background documents, presentations, policy briefs, briefing and concept notes, reports, aide memoires, outreach, and other material.
 - o Support and/or lead the organization of outreach activities such as webinars, workshops, and other events.
 - o Support the fundraising efforts, as well as coordination and initiative with Member States and other relevant stakeholders.
 - o Support the reporting from the perspective of partnerships, communication and stakeholder engagement.
 - o Provide and consolidate inputs and facilitate the exchange of information among colleagues.

- o Participate in team meetings online, when present at Duty Station and represent the unit online, at Duty Station and in external meetings as required.

2. Facilitating the coordination of work under the Global Wastewater Initiative (GWWI) and Global Partnership on Nutrient Management (GPNM).

- o Participate in the preparation and finalization of outreach and other relevant written material.
- o Organize various engagement opportunities including joint events between the two partnerships and other key events organized by the Unit.
- o Co-organize webinars on critical issues related to sustainable wastewater, nutrient, and marine litter management.
- o Assess and update the existing outreach material and knowledge and keep it visible to internal and external stakeholders.
- o Encourage gender, youth and indigenous people mainstreaming and integration within the work of the Unit.

Output expectations

- The tasks assigned to the incumbent are timely delivered and with good results.
- Communication strategies, stakeholders' engagement plans and/or partnerships arrangements to promote the work of the Unit are developed and implemented.
- Coordination and fundraising efforts are supported as needed.
- Meetings and fora are organized successfully.

Travel

Travel will be based on requirements/needs that will arise and availability of funds. The Junior Professional Officer/Associate Expert will also be encouraged to use her/his training budget to attend study programmes, visits to ongoing projects, key events or any other professional development opportunity.

Training and Learning Elements

Training

Training opportunities encompassing substantive project management skills, leadership, as well substantive environmental training courses are a crucial element and shall be

discussed and agreed upon with the Supervisor, based on the needs of the Junior Professional Officer/Associate Expert and the Unit.
