

## **2.6 JPO - Project Officer (Migration, Environment and Climate Change) – Lima, Peru**

Support to the strengthening of programme development and advocacy: Identify opportunities and support data-driven programme/project design and development and resource mobilization initiatives on human mobility in contexts of disasters, environmental degradation, health issues and climate change; Support engagement with National Authorities, Ministries, civil society organizations and UN agencies in the area of migration, environment and climate change to accelerate the country's achievement of SDGs and other commitments on climate change; Carry out research on key priority thematic areas; identify and synthesize best practices and lessons learned to inform the adaptation and evolution of IOM's programming; and contribute to the development of knowledge and communication products. Support to project management: Support the implementation of migration, climate change, environment, and disaster risk reduction projects, under close guidance and in consultation with the direct supervisor and in line with IOM's programming and operations policies and procedures; Support the monitoring and evaluation of IOM migration, environment climate change projects and contribute to proactive work planning, risk management, and review processes; Support the review and drafting of project products, reports, and capturing of results and lessons learned. Support to the strengthening of the Country Office's response to climate change and environmental issues: Contribute to environmental sustainability efforts and the use of office/projects' resources and practices to help mitigate climate change, by conducting environmental resources analyses and recommendations; Contribute to the implementation of an environmental humanitarian response by conducting assessments and assisting with the development of guidelines; Participate in the

UN Interagency Groups on environment and climate change and provide technical support when designing UN common planning tools (CCA, CF, UN Strategies, etc) and in the implementation and monitoring of joint climate change initiatives.
